PROUDLY BUILT IN THE USA

TAKE A CLOSER LOOK AT HOW ALL OF THE FEATURES OF THE PAYMASTER SYSTEM WILL ENHANCE AND PROTECT YOUR NEGOTIABLE DOCUMENTS.

■ A SERIOUS CHECK LOSS CAN CRIPPLE YOUR BUSINESS OR PERSONAL FINANCES AS BADLY AS A NATURAL DISASTER!

■ Several billion dollars a year are stolen by white collar criminals. It is vital that you protect your bank account from loss through alteration of your checks or forgery of your signature.

■ YOUR NEED FOR CHECKWRITING SECURITY DOESN'T END WHEN YOU COMPUTERIZE!

■ If you are using a dot-matrix or laser printer to write checks, your checks can be forged or altered as easily as a type-written check! Common methods of chemical, abrasive, or erasure alterations have proven highly successful on computer checks!

Paymaster's exclusive checkwriting security features offer the assurance and protection our competitors can't!

EXCLUSIVE REPLACEABLE RIBBON CARTRIDGE

Following years of development, Paymaster now offers the only manual checkwriter with a replaceable ribbon cartridge. This exclusive feature allows your checks to be imprinted with a pure dye based security ink. In recent evaluations, conducted by a nationally renowned, independent engineering firm, our imprint was judged by far the most secure against chemical or abrasive alteration! (PATS. PENDING)

OUR TYPE FACE DESIGN

For decades, bank officials, money order company executives, and forensic experts have all agreed that the manual checkwriter impression remains the most reliable and safe impression with which to issue negotiable documents. We have combined our years of experience and proven success to develop what we consider to be the most secure type style ever offered! With the help of forensic experts, our character design defies successful character alteration or superimposure.

SERRATED SECURITY

Cast from a superior zinc alloy material, the Paymaster type faces include a deeply serrated pattern which "mesh" with a printing platen to drive the dye based ink deeply into your check. Within minutes of impact, migration of the ink begins, ultimately creating a "mirrored-image" on the backside of the document.

CUSTOMIZED SLIDING PREFIX PLATE

No matter how large or small your imprinted amount, this sliding serrated plate imprints directly in front of your first digit eliminating the possibility of criminal insertion of additional figures! Custom name plates are available for designating a variety of global currencies. (PATS. PENDING)

KEY LOCK ENTRY SYSTEM

Comprised of a durable locking mechanism, a lock, and two specially coded keys, this system restricts the unauthorized activation or use of your checkwriter.

HEAVY DUTY IMPRINT CONSTRUCTION

All Series 9000 Paymaster checkwriters are designed for the Heavy Duty imprinting of Multiple Copy Documents. Unique frame construction, along with the use of self-lubricating bushings to house the printing mechanism will assure you thousands of high quality and secure multiple copy imprints!
